SUMMARY

Senior Front-End Developer and Tech Lead with 12+ years of experience building web applications with React, Next.js and TypeScript, from fintech and e-commerce products to a B2B CRM/ERP platform for an Austrian electronics distributor. Experienced in front-end architecture, design systems and data-heavy interfaces, and in building and mentoring front-end teams. I enjoy designing processes that make a team's daily work simpler.

SKILLS

Languages & Core	JavaScript, TypeScript, HTML5, CSS3, Sass, Stylus
Frameworks & Libraries	React, Next.js, React Query, Redux, Redux Saga, Tailwind CSS, shadcn/ui, Bootstrap, jQuery
Tools & Platforms	Git, REST APIs, Node.js, PWA, MCP, Microsoft 365 integration, Figma, Photoshop
Practices	Front-end architecture, design systems, performance optimization, accessibility, SEO, Scrum, team leadership, mentoring

WORK EXPERIENCE

Senior Frontend Developer

Sep 2024 – Present

AustroByte, Austria

B2B distributor of electronic components. I lead front-end development of the company's internal CRM/ERP platform for sales, purchasing, inventory and supply-chain operations.

- Led front-end architecture and development of the CRM/ERP platform, from initial design to production
- Built complex, data-heavy interfaces for the full sales cycle: accounts, contacts, deals, RFQs, quotes, sales orders, invoices and purchase orders
- Built inventory and supply-chain modules: multi-warehouse stock, reservations, stocktakes, lot traceability, part alternates, lifecycle status and vendor comparison
- Built analytics dashboards for pipeline insights, account health, pricing intelligence and customer communication metrics, using Microsoft 365 email and Teams call data
- Created a reusable component library and design system with shadcn/ui and Tailwind CSS, keeping the UI consistent and speeding up feature delivery
- Worked with backend engineers on API design and contracts; integrated AI-assisted features through an MCP-based CRM server
- Improved performance, accessibility and usability through profiling, code-splitting and optimized data fetching

Tech stack: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, REST APIs, Git

Front-End Tech Lead

Apr 2022 – Aug 2024

Asr Novavaran Dayan

- Built the front-end team from scratch and led hiring
- Restructured legacy code and decoupled the front end from the back end
- Launched a fast-checkout cart for the company's affiliates and stores
- Redesigned the Dayan Shop website and developed the Omdino wholesale e-commerce site
- Built WhatsApp and Telegram bots for order intake and promotions
- Launched dynamic landing pages for in-app advertising, improving the ad pipeline

WORK EXPERIENCE (CONTINUED)

Senior Front-End Developer
Nov 2018 – Mar 2022

Fanap

- Developed Playpod, a cloud gaming console website
- Developed Podium, an API marketplace, and rebuilt it with Next.js to improve SEO
- Developed the pod.ir website
- Built and extended several other Fanap products; grew and mentored development teams

Front-End Developer → Senior Front-End Developer
Jun 2014 – Nov 2018

Part Financial Information Processing

- Set up the front-end team structure; mentored interns and new team members
- Built the company's in-house CSS framework on Stylus
- Implemented the Signal project's first design version and the Merat credit-scoring project
- Developed Rasam (investment-fund platform) and Sepam (financial information system)
- Developed a bank customer-club website and its admin panel

EDUCATION

M.Sc. in Artificial Intelligence and Robotics
2017 – 2020

Imam Reza International University

B.Sc. in Computer Engineering (Software)
2011 – 2016

Sadjad University of Technology

AWARDS & ACTIVITIES

- 2nd place, Game Programming Competition, Ferdowsi University of Mashhad
- 2nd place, Line-Follower Robot Competition, Khorasan Province
- Robotics course instructor, Region 7 Research Center; participant in Kharazmi and PNUOPEN robotics competitions
